TE EXTERNAL WORKFORCE PROGRAM

As a TE Connectivity supplier, your organization is part of TE's large, global external workforce. To improve efficiency, automate and standardize processes for this workforce, we're pleased to announce a new partnership with SAP Fieldglass and KellyOCG.

- TE has selected SAP Fieldglass to become the Vendor Management Solution (VMS) for the procurement and management of our external workforce. Using Fieldglass will enable TE to more effectively manage the sourcing, hiring, and administration of contract labor and the suppliers who help us meet our contingent staffing needs. With this initiative, TE joins a growing list of Fortune 500 companies, in implementing a VMS.
- We've selected KellyOCG to help track and monitor all activities related to obtaining and managing contract services.

Global Resource Tracking Launch in February

The new system and processes to track external workers, through SAP Fieldglass, will be introduced globally February 24, 2020. All suppliers of external workers, including contractors, consultants and any other person that requires TE network access, will be required to enter their workers into SAP Fieldglass.

All suppliers of external workers, including contractors, consultants and any other person that requires TE network access, will be required to enter their workers into SAP

The system will allow TE to:

- Streamline the on-boarding and off-boarding process for external workers,
- Track basic information about external workers (position, title, start/end dates, etc.),
- Provide workers with access to TE sites and systems, and
- Enable external workforce reporting.

At this point in time, TE is only launching Resource Tracking, which is a basic module to track TE's external resources. Suppliers do not need to sign a NDA with KellyOCG, who is acting as a data processor on behalf of TE. However, TE will be

amending supplier contracts to reflect the resource tracking requirements, which includes the use a vendor management system, SAP Fieldglass.
